(Under Construction) 2

TheGame

... is the Incredible Secret Money Machine

After 20 years my research found several patterns projecting tomorrows Stock Market Behavior. My webpage will show you which Stock/ETF's to buy weekly and when.

Anyone profiting in the stock market would not waste their time trying to get more money from other people, no matter how polished their operation.

TheGame is an intelligent computer program that I developed over many years to reduce the odds of losing in the Stock Market. It uses data collected daily in real-time to determine if the Stock Market Mood tomorrow will be Bull or Bearish or just Wait.

TheGame 21-Ticker PDF will indicate what you should favor - 30 minutes before the Market close.

To double your portfolio value annually you just need a 6% profit each month. A single \$10,000 could become \$320,000 in 5-years. 2-4-8-16-32 . . . SPY/VOO only gets you about \$6000 over the same period.

- The Goal of TheGame is to Avoid Profit Loss -

(2)		14:28 EST Market Trending Bear			Success is no profit loss or over 5% profit per bet, holding 2 to 5 days max!

Col 1 - The total profit or loss the last 10 Trading Days based upon a \$10,000 investment. The Teal blue cells are stocks up-trending the last 3-weeks.

Col 2 – The last 5-day profit or loss. Each day is divided into 8 intervals and uploaded 8 times daily with refreshed data. If the last interval is Red it is selling off. Yellow is Neutral while Green it is in demand, especially at the end of the day.

Col 3 - The best stock symbols right now out of 1000.

Col 4 - Latest Share price. Also the cell will be bright green if it is a good trading pattern.

Col 5 – A few indicators like now seen Red mean a missing day of data, like a holiday. Also, it will say “good” if a healthy trading pattern is detected. A suggested Buy will show this “???”

Col 6 - The latest profit or loss. If a “good” trading pattern is detected a White box is placed around the cell.

Col 7 – Bright Teal reveals the Oen of 3-days in a row.

Col 8 - The Dark Green, Light Green, Pink, cells with “White” letters are a suggested Buy signal.

The best time to Buy or Sell is in the last 15 minutes of the trading day.

- Set an Alarm -

My 21-Ticker PDF is the Top-Performing stocks right now, posted weekly.

To double your portfolio value annually you just need a 6% profit each month. A single \$10,000 could become \$320,000 in 5-years. 2-4-8-16-32 SPY/VOO only gets you about \$6000 over the same period.

My freely shared 21-Ticker PDF is a spreadsheet on Steroids. It uses real time data, then makes suggestions of how I should play each day . . .

Your questions can stimulate new ideas for everyone
